Description

## Glass Filtration Media

glass filtration media is manufactured from 100% recycled glass as sifting crushed glasses and taking desired sizes. Our glass filtration media is in 3 different sizes and has superior treatment performance compared to quartz and silica sand.

### GFM

- Improves water clarity up to 25% compared to sand
- Removes finer particles from water than silica sand
- Reduces consumption of chemicals
- Can be used up to 3 times longer than silica sand
- Reduces the water consumption used in backwashing
- Does not support moss/fungus growth
- Requires up to 20% less media
- Provides labor and time saving
